

Hard-Shell Carrying Case
for storage and transport of your system

Order Number:
[CAS3]

This carrying case is tough and functional. Throw it in the back of a truck or stow it overhead during your flight. The CAS3 holds your system and is very light and comfortable to carry.

Features of the CAS3

The CAS3 is our most popular carrying case for PowerSight and its accessories. Its features include:

- Tough blow-molded shell
- Die-cut foam inserts to hold all your system parts
- Ergonomic handle for comfortable carrying
- Secure snap-tight locks for the lid
- Compact: 19 x 16 x 7 inches (outside)
- Light weight: less than 15 lbs with system inside

These cases have proven that they can stand up to daily use in all types of environments. They are often used without external protection when shipping systems via common carriers.

The cut-outs in the case leave dedicated space for:

- PowerSight meter
- Four current probes
- Voltage Leads
- Communications cable
- Charger
- Manual & CD-ROM.

If you have a need to store other accessories, check into one of the soft carrying cases or an auxiliary hard-shell carrying case.

Availability

The CAS3 is available for immediate purchase from Summit Technology Inc. To order, simply specify **CAS3**.
